

LNB MOUNTING ACCESSORY

MC-ACLNB-1101

Professional Aluminium LNB Holder for Satellite Dish Installations

Professional Product Overview

Robust aluminium LNB holder designed for professional satellite dish installations. The accessory provides durable mechanical support for a single Ø40 mm LNB, helping maintain secure alignment and long-term installation stability.

Aluminium Body	Ø40 mm
Robust construction	LNB holder diameter
0.115 kg	TD Dish Compatible
Net weight	Mounting accessory

Professional satellite mounting accessory for MICORUS dish and LNB installations

Description & Key Features

DESCRIPTION

The MC-ACLNB-1101 is a professional aluminium LNB holder designed to provide strong and reliable support for satellite dish installations. Its aluminium construction offers improved durability and robustness compared with standard plastic accessories, making it suitable for demanding outdoor mounting environments.

01 Aluminium Construction

Provides improved durability and mechanical stability for professional dish installations.

03 Robust Mounting Design

Supports stable alignment and long-term reliability in satellite reception systems.

05 Professional Compatibility

Intended for use in compatible satellite dish mounting assemblies.

02 Single LNB Support

Designed to hold one standard Ø40 mm LNB securely in position.

04 Compact Accessory Format

Lightweight component suitable for quick installation and replacement.

06 SMATV Installation Support

Useful in reception systems feeding multiswitches and RF distribution infrastructure.

Application Note

Recommended as a professional replacement or installation accessory for satellite reception systems requiring durable LNB mounting hardware.
