HOTEL GUEST ROOM PHONE

MC-APH-R404

DESCRIPTION

MC-APH-R404 is a modern and stylish VoIP corded landline telephone specifically designed for home, guest, and hotel room applications. This high-performance device features a built-in display for caller ID presentation and operates via a professional IP/PoE network connection. It is built with a durable ABS plastic casing and supports advanced internet phone functions, including XML/LDAP and an extensive memory capacity for up to 500 records. The system is engineered for seamless compatibility with mainstream IP PBX and soft switch platforms such as Asterisk, Broadsoft, and 3CX. Additionally, its simple yet elegant design is complemented by multi-step handset volume control and automatic take-up functionality to provide a superior user experience.

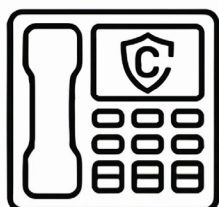

HOTEL GUEST ROOM PHONE

MC-APH-R404

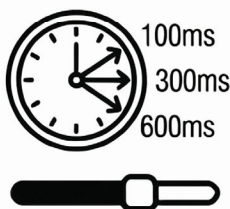

FEATURES

- Custom Logo Design: Offers a premium aesthetic with the ability to include a custom logo, tailored for hotel branding.

- Triple-Proof Protection: Specially engineered to be waterproof, moistureproof, and fireproof for maximum durability and safety.

- Flexible Technical Compatibility: Supports adjustable flash time settings (100ms, 300ms, or 600ms) to ensure compatibility with different PBX systems.

- Message Waiting Light: Features a standard 90~150V DC message waiting light voltage to keep guests informed of new notifications.

- PoE Network Support: Utilizes Power over Ethernet (PoE) for efficient network transmission and 20P/IP PBX caller number presentation, and an automatic take-up function for enhanced convenience. Moistureproof Construction: Specially designed to be moistureproof, ensuring high reliability and a long service life of up to 3 years.
