

HOTEL GUEST ROOM PHONE

MC-APH-R406BE/B

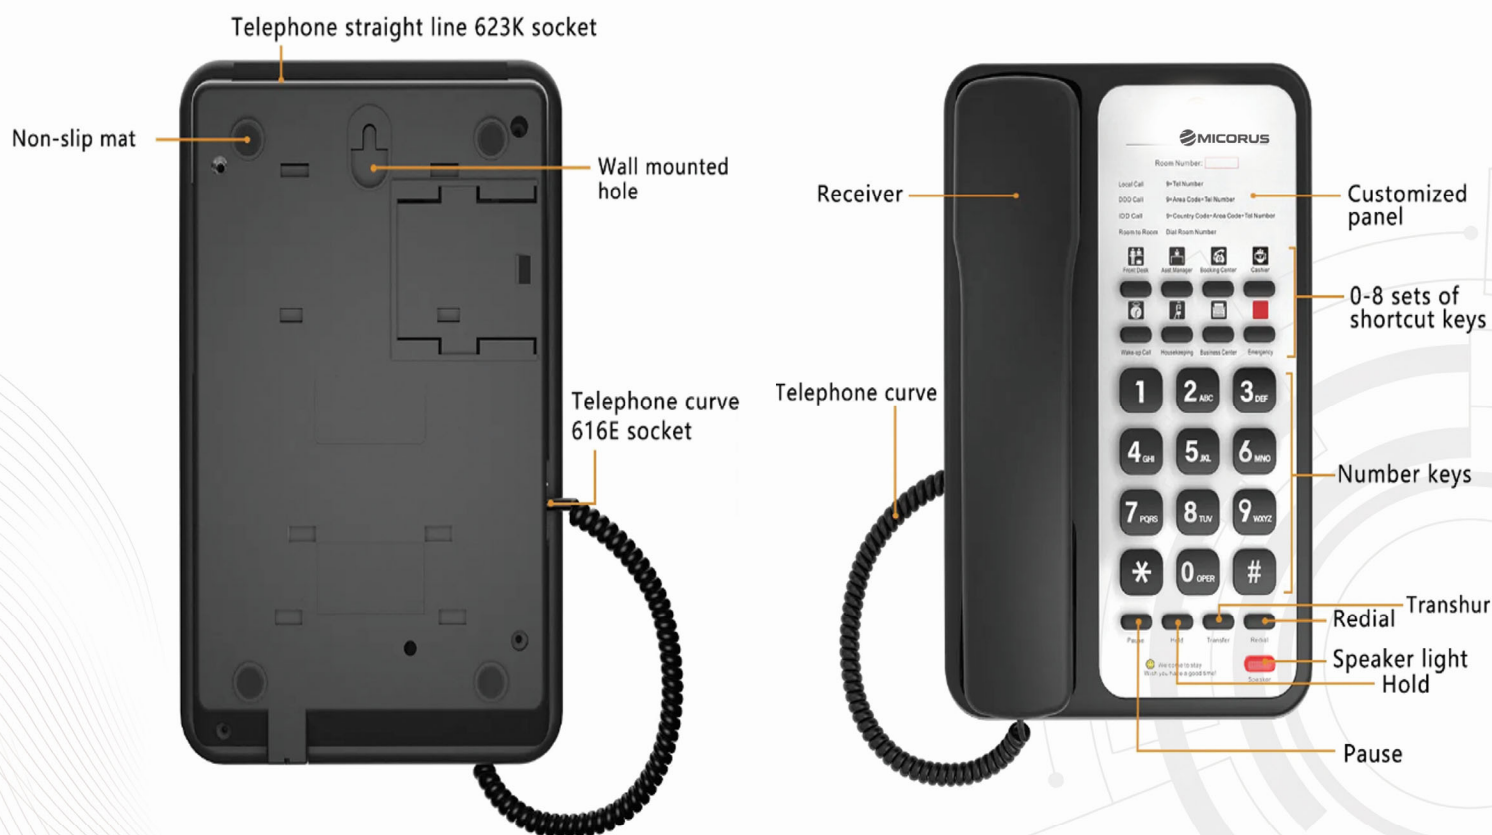

HOTEL GUEST ROOM PHONE

MC-APH-R406BE/B

DESCRIPTION

MC-APH-R406BE/B is a professional corded analogue landline telephone designed for high-end hotel guest rooms and office buildings. This durable device is constructed from a high-quality ABS plastic case and features an integrated CPU control system with surface-mounted technology for stable performance. It supports the standard DTMF dialing system and operates efficiently within a DC voltage range of 24V to 60V. The telephone is engineered to function in diverse environments, maintaining reliability in temperatures ranging from -10°C to +40°C. Furthermore, its design is optimized for hospitality needs, offering full compatibility with major PBX systems such as Avaya, NEC, and Siemens.

HOTEL GUEST ROOM PHONE

MC-APH-R406BE/B

FEATURES

- Customizable Service Buttons: Available with 0, 3, 5, or 10 one-touch memory keys to provide guests with immediate access to hotel services.

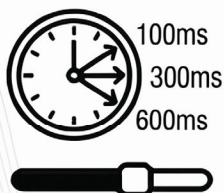

- Triple-Proof Durability: Engineered to be waterproof, moistureproof, and fireproof, ensuring a long service life and high safety standards.

- Adjustable Sound Control: Features a multi-step handset volume control to ensure clear and comfortable audio for every user.

- Message Waiting Indicator: Includes a message waiting light with a standard voltage of 90~150V DC to notify guests of new messages.

- Flexible Flash Timing: Offers optional flash time settings of 100ms, 300ms, or 600ms to match specific technical requirements of different PBX networks.
