

120W VOLUME CONTROLLER

MC-VC120W

Power Rating 120 W	Weight 0.2 kg
Dimensions 86 x 86 mm	Application Professional audio

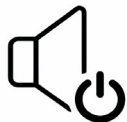

Description & Key Features

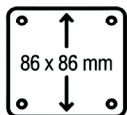

The MC-VC120 W is a compact wall-mounted volume controller for 100V line audio systems. Its 30W rating makes it suitable for small to medium speaker zones where simple local level control is required. The 86 x 86 mm square design and durable ABS construction allow clean installation in commercial interiors.

FEATURES

- 120W power handling for small and medium zones.
- Standard 86 x 86 mm square wall-plate format.
- Smooth multi-step rotary attenuation control.
- High-grade ABS enclosure for reliable daily operation.
- Elegant white finish for discreet wall installation.
- 100V line compatibility for PA and background music systems.

- High-capacity 120W power handling ideal for medium-sized speaker zones and professional setups.

- Standard 86 x 86 mm square design ensuring a clean and consistent look across all wall-mounted controls.

- Multi-step rotary attenuation for precise and smooth control over background music and paging levels.

- Industrial-strength ABS construction designed to withstand frequent use in busy commercial environments.

- Sleek, minimalist white finish that provides a modern aesthetic and blends with any interior wall.

- Full 100V line compatibility optimized for high-performance public address and BGM distribution.
